

## *AS-Xpress Register DB*

"AS-Xpress Register DB" makes your register, archive or collections available online. A service that's both simple and logical on multiple platforms.

Everything happens in the cloud so the user can get access to the register no matter where they are in the world. You can create PDF-files with standardized labels and a complete list over your register. A smart function is that you can "order" a document you want access to this can be useful if the document is not digitalized yet. It's also possible to attach files to a post.

# AS-Xpress Register DB

## Summary

AS-Xpress Register DB is a new concept based on user needs for simple solutions with great functionality. It's easy to organize documents and binders. You can be as detailed as you want down to the specific document e.g. an important contract or deal. Documents can be attached to a post and can then be downloaded wherever you are in the world.

## Get started

To get started you will need an import file. The import file is a standardized XML-file and we currently support the following (more can be added).

- Visual Arkiv 6 (Non-standard by Fujitsu Sweden, Gothenburg)
- Arkis II / Klara (Standard based on EAD by Swedish National Archive)
- AS-Xpress Register DB (Simple XML created with AS-Xpress Register)

## Advantages and profits

AS-Xpress Register DB is primarily based on open source and does not contain any proprietary software or library. So it's easy for any one to setup on their own server, or let us take care of the daily backups, availability, security and updates and get your own system in the cloud.

## Requirements...

### In the cloud

- Internet Connection

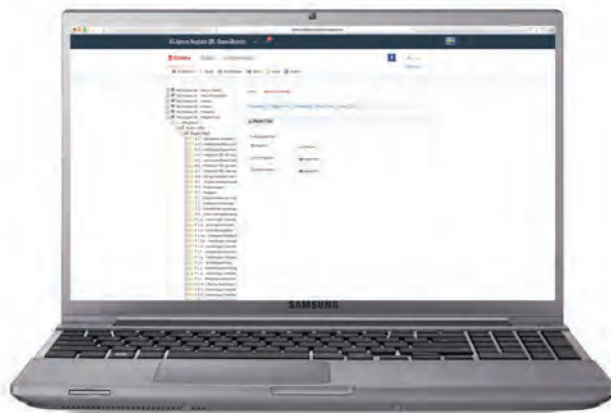

### Own server

- Windows 7+ or Linux
- Apache 2.2+ or IIS 7+
- PHP 5.5+
- MySQL 5.6+ or MariaDB 10.0+
- mod\_rewrite / IIS\_Rewrite

Tested with Internet Explorer 9+, Google Chrome, Mozilla Firefox

- Download Register and/or labels as PDF
- Watch and download Attached documents
- Order Pre-order documents, volumes etc. before arrival.
- Search and find Great search engine with filtering
- Fully translateable Get the system in your language
- Storage engine Store files on FTP, Amazon S3 or locally.
